# ovens that do it all

The market for multi function electric ovens is now mature and covers a wide choice of price points. Ovens at the lower end of the scale typically offer around four functions based around a fan or forced air system while further up market there can be up to 12 different features, often including one touch programmes for popular dishes, a roast probe, pyro clean, cook by weight and more.

The Scandium 1133.4TwYX from Amica has eight functions and an electronic programmer while the Scandium 1133.4TdYX has 12 functions including Super-roisserie, top and bottom heat, convection, grill and fan cooking. The electronic programmer on the 1133.4TdYX has retractable controls and a clear LCD display for easy programming and features 15 pre-programmed recipe settings.
